Munford/Bulloch Charge to Victory at Pro Rock Round 2 in New Mexico

Cedar City, Utah – (May 3, 2005) Dean Bulloch and Karl Munford proved again they are the kings of professional rock crawling by capturing victory at the Pro Rock Superlift Series. Bulloch fought off challenges from world-class competition as some of the top competitors in professional rock crawling battled at Pro Rock Round 2 in Farmington, New Mexico.

This was Bulloch's third victory in five competitions so far in the 2005 season. The Supercrawl champions have consistently led in four of the five professional rock crawling competitions and have finished in second and fourth positions in the two events they did not win. By staying up front most of the weekend, Bulloch put the pressure on the competition as he implemented his strategy on each and every move with the winningest spotter in professional rock crawling, Karl Munford.

"The performance of the BFGoodrich Krawler KX tire matched with the Walker Evans beadlock wheel is second to none. We feel we can take this tire and wheel combination to any event whether in the rain, mud, snow or dry conditions and it performs superior to the other brands. Regardless of what kind of rock we are competing on, BFGoodrich tires and Walker Evans Wheels continually lead us to victory through the toughest of conditions."

The rocks of Farmington, New Mexico proved to be ideal conditions for the BFGoodrich sponsored champions as their BFGoodrich Krawler KX tires gripped the clean rocks leading them to another win as they approach mid-season. Recent storms doused the southwest with big rains and wind prior to the event cleaning the surface of the rocks allowing Bulloch to drive his professional rock buggy anywhere he wanted, including right into the winners circle.

On Track Krawler Team® heads to Round 2 of the UROC Pro-National Series at Firebird Raceway, Phoenix, Arizona on May 12-14, 2005. In the mean time, you may visit them at www.ontrackkrawlerteam.com
